## About Us

Founded in the 1940's, Pulverman started out with eight employees in a 9,600 square foot building. At that time, the company posted modest revenues around \$500,000 a year. Today, we employ over 160 people and our current annual sales revenue tops the \$20 million mark.

We are a world-class, international ISO/TS 16949 certified, metal fabrication and product manufacturer focused on flexible manufacturing that solves our customers' needs. With over 70 years of experience in component fabrication, Pulverman has emerged as a visionary leader in the precision metal industry. We specialize in laser cutting, powder coating, stamping and welding for the automotive, aviation, agricultural, architectural, construction, transportation, retail, appliance, lighting, electronics, computer, industrial and HVAC markets. Our large selection of products and services fits a wide range of needs.

From our state-of-the-art facility in Dallas, Pennsylvania, Pulverman serves a global marketplace. Our 80,000+ square foot facility and new 3,000 square foot office will improve effectiveness and efficiency in all aspects of our precision metal process. Our high-tech equipment includes several Prima Platino laser cutting systems to ensure that your order falls within precise specifications. Our workload is balanced between short and long-term manufacturing cells to increase productivity for our diverse customer base. Our engineers use the latest versions of design and 3D modeling software to create and refine your product design.

Pulverman employs a talented and seasoned team of sales professionals, operations experts, metal workers and engineers who are engaged in their work and committed to partnering with customers to find unique solutions to their problems.

## World-Class Accreditation

There is one international standard, ISO/TS 16949, which incorporates certification to the quality management system standard in ISO 9001. The general trend is to move away from the national standard schemes to the international ISO/TS 16949; however, few manufacturers have adopted the new standard. Pulverman is one of the few manufacturers who have established a leadership position as a ISO/TS 16949 company; assuring you one of the best manufacturing services in the world.

Accredited certification to the ISO/TS 16949 quality management system demonstrates both our commitment to product quality and compliance with customer-specific requirements. The system is an ongoing process that helps find and report areas that need improvement within our own management system and in all relevant processes.

In working with Pulverman, an internationally recognized ISO/TS 16949 certified manufacturer, you can be assured that your project will be managed utilizing the "best practices" to minimize production variations and improve manufacturing efficiency. Certification to ISO/TS 16949 helps create a common quality system approach to the entire supply chain and facilitates access to the industry's "best practices."

Precision Metal Components

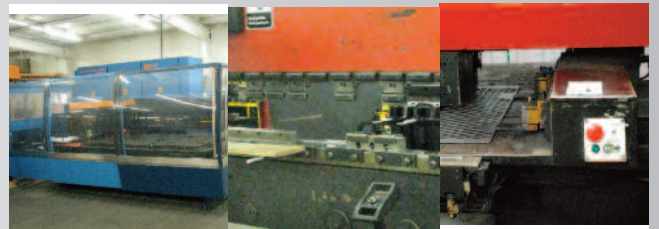

## Company Profile

80,000 square foot facility in Dallas, PA  
Privately owned by Randy Mark since 1999  
165 full time employees  
ISO 9001:2008 Certified-TS 16949:2009 Certified

## Equipment

Lasers-Turrets-NC Press Brakes  
Robotic Press Brakes -Robotic Welding  
Assembly-Packaging-Custom Rolling

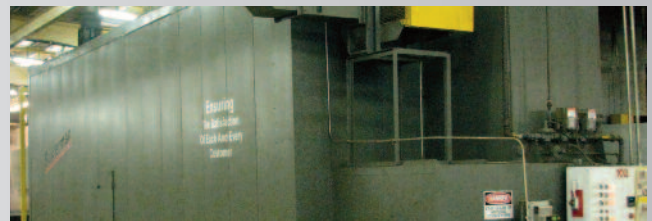

## Stamping

Punch Presses up to 300 Tons  
Press Bed sizes up to 48" Wide by 120" Long

## Powder Coating

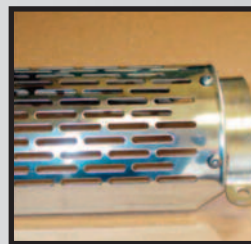

1,000 hr. salt spray rating  
All Colors and Textures available

## Industries Served

Trucking and Transportation-Home improvement and Construction-  
Computing-Appliance-HVAC Assemblies-Medical Cabinetry-Agricultural
